The Quiet Revolution

In 1971, the President’s Council on Environmental Quality published *The Quiet Revolution in Land Use Control*. The book described in detail the innovative land-use laws in nine states that returned the control of land use to a state or regional level, largely at the expense of local zoning. This constituted the “Quiet Revolution.”

The Kratovil Quiet Revolution Conference will bring together national scholars and experts in land use to analyze the lasting impact of the Quiet Revolution in several jurisdictions around the country and examine the future of land-use policy. This national debate started with two scholars in Chicago, so it is a fitting site for a reexamination of the issues surrounding this 40-year-old national debate and the legislation it produced. The Kratovil Quiet Revolution Conference will begin with an analysis of the impact the Quiet Revolution has had on our nation and land-use policy. National speakers representing several states involved in the Quiet Revolution will analyze how the Quiet Revolution unfolded in these jurisdictions. The second panel will focus on issues of regional planning in Chicago and the surrounding region. The final panel of the conference will look to the future of regional planning and lessons learned from the Quiet Revolution.

As part of the Center for Real Estate Law’s mission, the Kratovil Conference on Real Estate Law & Practice was established in 1993 to bring together leading scholars, practitioners, and industry professionals to consider cutting-edge issues important to commercial real estate attorneys, their clients, industry leaders, and our society. The Kratovil Conferences are unique because they address the policy and practical implications of issues of concern to the real estate industry and to the attorneys who practice in the field. It is the only forum presented by a law school involving the interaction between scholars, leading practitioners, and industry leaders on topics related to commercial real estate law and practice. The Kratovil Conference addresses the need to engage both practitioners and scholars in the real estate area in order to produce scholarship that is directly relevant to the real estate industry.

THE QUIET REVOLUTION

In 1971, the President’s Council on Environmental Quality published The Quiet Revolution in Land Use Control. The book described in detail the innovative land-use laws in nine states that returned the control of land use to a state or regional level, largely at the expense of local zoning. This constituted the “Quiet Revolution.”

The Kratovil Quiet Revolution Conference will bring together national scholars and experts in land use to analyze the lasting impact of the Quiet Revolution in several jurisdictions around the country and examine the future of land-use policy.

This national debate started with two scholars in Chicago, so it is a fitting site for a reexamination of the issues surrounding this 40-year-old national debate and the legislation it produced. The Kratovil Quiet Revolution Conference will begin with an analysis of the impact The Quiet Revolution has had on our nation and land-use policy. National speakers representing several states involved in the Quiet Revolution will analyze how the Quiet Revolution unfolded in these jurisdictions. The second panel will focus on issues of regional planning in Chicago and the surrounding region. The final panel of the conference will look to the future of regional planning and lessons learned from the Quiet Revolution.

As part of the Center for Real Estate Law’s mission, the Kratovil Conference on Real Estate Law & Practice was established in 1993 to bring together leading scholars, practitioners, and industry professionals to consider cutting-edge issues important to commercial real estate attorneys, their clients, industry leaders, and our society. The Kratovil Conferences are unique because they address the policy and practical implications of issues of concern to the real estate industry and to the attorneys who practice in the field. It is the only forum presented by a law school involving the interaction between scholars, leading practitioners, and industry leaders on topics related to commercial real estate law and practice. The Kratovil Conference addresses the need to engage both practitioners and scholars in the real estate area in order to produce scholarship that is directly relevant to the real estate industry.
